Professional Summary

Computer Science graduate (December 2025) and backend-focused full-stack developer experienced in building Java/Spring Boot APIs, React/TypeScript interfaces, and relational database applications. Developed AI-assisted local business analysis software for the 2026 Meta Global AI Developer Hackathon and worked on academic and business-facing applications. Comfortable with debugging, testing, schema migrations, and end-to-end integration.

Technical Skills

Languages: Java, TypeScript, JavaScript, SQL, Python, C#
Backend: Spring Boot, Spring Data JPA, REST APIs, Maven, JUnit, FastAPI
Frontend: React, Vite, HTML, CSS, responsive web applications
Databases: PostgreSQL, MySQL, relational modeling, Flyway migrations
AI and Tools: Meta Model API, SAM 3.1, Ollama, Git/GitHub, FFmpeg, Postman, Google Cloud

Selected Software Projects

S4 Neighborhood Intelligence | Independent Full-Stack Developer Oct–Nov 2026
Java 21, Spring Boot, React, TypeScript, PostgreSQL, Flyway, Meta Model API, Ollama

- Built a local-business analysis application with business workspaces, evidence reports, analysis history, and a unified research interface for the Meta Global AI Developer Hackathon.
- Implemented REST-backed storefront media and analysis workflows; integrated Meta AI-based inspection and segmentation with local Ollama support.
- Added persistent analysis history, database migrations, and automated tests; prepared a working demo and published project source on GitHub.

S4 Business | Independent Developer (In Development) 2026–Present
Java, Spring Boot, React, TypeScript, PostgreSQL, Ollama, ComfyUI, FFmpeg

- Developing an AI-assisted marketing platform that organizes business research, content strategy, campaign planning, asset generation, review, and publishing workflows.
- Designed configurable service- and goal-based campaign flows and integration points for local image generation, video assembly, and social platform APIs.

StudentNest | Backend / Full-Stack Developer, Senior Capstone 2025
Java 21, Spring Boot, React, MySQL, REST APIs

- Collaborated on a five-person CSULB capstone team to build an academic management system with student, professor, and administration workflows.
- Developed backend APIs and relational data features for registration, degree planning, and tuition-related operations; integrated and debugged frontend/backend flows.

Golden Brows Web Platform | Independent Developer 2025–2026
React, Java, Spring Boot, SQL, Wix Studio

- Developed a React/Spring Boot booking prototype and supported the real business website and service presentation, including a later migration to Wix Studio.
- Translated business requirements into service pages, booking flows, and customer-facing improvements; maintained site content and integrations.

Education

California State University, Long Beach Dec 2025
Bachelor of Science in Computer Science

Cerritos College May 2023
Associate Degree

Additional Experience

Customer Service and Operations 2019–2026
Experience in casino cashiering, rideshare/delivery, and retail environments requiring accuracy, professional communication, time management, and independent problem solving.
